**Letter of Recommendation for Dipl. Ing. Luboslav IVANKO**

Mr. Luboslav Ivanko, born on November 10<sup>th</sup>, 1978, started the study of Communication and Information Technologies at the Academy of the Armed Forces, Department of Informatics, Liptovský Mikuláš, Slovakia in the year 2000. Mr. Ivanko worked under my supervision as a student from September 1, 2003, when he started to work at his diploma thesis entitled "Design and optimalization of cybernetic systems using expert systems" until April 5, 2005. Results of his diploma work were presented on the international student scientific conference in 2005 in Liptovsky Mikulas and won the second place in the section of computer science and informatics.

Mr. Ivanko during his work on diploma thesis documented to be a well-motivated and gifted student, quick learner and team worker, demonstrating all the skills necessary for computer work. He is competent, well organized and he has also excellent communicative skills, ability of analysing and solving problems. He has learned all techniques for microelectronic and programming inclusively theoretical knowledge.

Mr. Luboslav Ivanko during his study at our Department passed with me the exams of Programming Languages and Digital Systems, both with very good results. Also others exams were passed only with the best results. During his study Mr. L. Ivanko proved himself to be an able student, a hard worker, and a talented programmer and showed ability to be the leader of small student groups during practical labs, thanks to his good practical experiences. His theoretical and practical knowledge in the area allowed him to solve different problems with designing program systems for various tasks.

As follows from previously mentioned, I recommend him for creative work with high requirements due to find new solutions of complex problems. Mr. L. Ivanko has good potential for his further professional growth.

If you would have any question, do not hesitate ask me.
